

CANVASBACK A sloping profile distinguishes the Canvasback from all other ducks. This species creates its summer homes in prairie marshes and during the winter on large lakes, bays, and estuaries. The Canvasback by MossCreek is also distinguished by a distinct sloping profile. Porthole windows, canoe paddle accents, and a wave form chimney top, all work to give this home it's mountain-nautical theme. The interior features open living areas and master suite with beamed ceilings. The vaulted ceiling of the great room lets dramatic light fill the home. On the upper level the Canvasback features two pleasant guest rooms, divided lavatories, and loft and sitting areas. At home on any lake, bay or estuary, the Canvasback is an ideal home for enjoying Americas outdoors.
